

Waning Crescent Moon in Taurus...

Posted on **July 21,2017** by **nmcreatrix**

I have been paying more attention to cycles in my life. Since I am post-menopausal, my menstrual cycle (the basis of years of cycles...) is no longer present, or not to the same extent it was before menopause. There was a Facebook post this morning about what phase of the moon you were born under and I checked it out. My results are [HERE](#) and there is a link where you can check your birthday... I found the description of my moon phase to be very interesting... and mostly spot on. Check yours out...
