This awesome post was at the top of my Facebook Feed this morning, the first thing that I saw. You can read the entire article [HERE](#) This quote struck me:

It's helpful to keep in mind Alberto Brandolini's Bullshit Asymmetry Principle or what's sometimes known as Brandolini's law: "The amount of energy needed to refute bullshit is an order of magnitude bigger than to produce it."

And her outlook on the entire situation seems to mirror my thoughts exactly. A very good read.
